

Mineral masterbatch NanoCom 8020CAPE

Product description:

NanoCom 8020CAPE is an ecological mineral masterbatch specially developed for technical extrusion processes.

Masterbatch 8020CAPE is based on a very technical treated ultrafine calcium carbonate with an excellent dispersion rate and combined with a LLDPE.

Masterbatch NanoCom 8020CAPE

Base	LLDPE
Calcium carbonate content	80%
Particle size	up to 1,2 μm
Whiteness	98%
Application rate*	up to 50%

*Application rate is not binding

Minimum order: 300 kg.

Standart Packaging: Polypropylene laminated 25 kg bags (pallet 1000 kg).
